Accommodation Host Families

All our host families live close to the school (maximum 10 minutes walk). We have been organising language courses since 1998 and have a close and confidential relation with all our host families.

Before the student arrives we send a complete description of the host family. This way, he/she will get to know them in advance and will be able to contact them -if necessary- to give them any necessary advice (allergies, special diets,...)

Shared Apartments

The student will live together with other students of different ages and nationalities. We always try to ensure the best atmosphere possible. In this way students can make a life together. They have the opportunity to try out new recipes or have a great time together in the living room.

The apartments are shared with 2-4 other students and the students provide for themselves. Students are responsible for buying groceries, cooking and cleaning. It is possible to book a double room even for those students travelling alone, we will place students in the same room according to their sex (For students 17 years old and above).
